ABSTRACTED-PUB-NO: RU 2024252C

BASIC-ABSTRACT:

An acaricidal compsn. contg. (wt.%): 18-22 benzyl benzoate, 0.8-1.2 household soap, 1.0-2.0 emulsifier No. 1, and remainder distilled or deionised water, is new.

USE - The compsn. is useful in the treatment of scabies caused by the tick Sarcoptes Scabiei and related species.

ADVANTAGE - The compsn. is a finely dispersed emulsion, and avoids a disadvantage of previous compsns., i.e. low physicochemical stability of the emulsion, resulting in increase in size of the dispersed droplets of active component on storage (10-200 mum), with consequent marked irritant action and possible burns.
